PROFESSIONAL SUMMARY

Experience Research and Product Development Manager with a demonstrated history of working in the chemicals industry. Skilled in Research and Product Development (R&D), Negotiation, Fast Moving Consumer Goods (FMCG), Analytical Skills and Business Development. Strong Research Professional and good Chemical Engineering experience in Sulphuric Acid Plants (SAP 1).

Skills & Expertise

- Research and Product Developments
- Products Validation - internal & external
- Expert in all home care, personnel care, soap & detergents and alcoholic and non-alcoholic beverages
- Process optimization
- Process simulation & improvement
- Production analysis and control
- Hazard analysis & critical control point (HACCP)
- ISO 9001:2015 Team lead
- Effective project management
- Discretion and confidentiality.

Education

MSc. Chemical Engineering – University of Lagos, Akoka, Nigeria (2015).

B.Eng. Chemical Engineering - Niger Delta University, Bayelsa, Nigeria (2011).

Professional Certification

Health Safety and Environment (HSE 2&3)

ISO 9001:2015 QMS Lead Auditor

Work Experience

Fumman Chemical Limited – Nov. 2021 till date.

Job Role: Research & Product Development Manager (R&D)

Job Responsibilities & Achievement:

- Rheology of fluid properties due to deformation, virtually materials in response to an imposed stress.
- Carrying out Intensive Product development on Fumman range of hygiene care (Cleaning solutions for household & industrial) and brewing chemicals.
- Work collaboratively in cross functional teams to investigate and rectify deviations from processes, product specification or MP compliance.
- Gathers, collates, and analyses data to identify opportunities for improvement.
- Defines and implements improvement projects.
- Liaise with production and Labs to support the investigations and provide the required scientific technical input into OOS manufacturing investigations for the appropriate root causing.
- Focus is on identifying long term engineered solutions.
- Authorization of Standard Operating Procedure (SOP), Technical Data Sheet (TDS), Material Safety Data Sheet (MSDS) of Fumman products range.
- Team Lead ISO 9001:2015 Surveillance Audit, and process input on Quality Management System (QMS).
- Carrying out Hazard Analysis and Critical Control Point (HACCP).
- Conduct in house training for Research chemists, Production personnel's and Process Engineering employees.

Metcem Limited, Iganmu – May 2019 – Nov 2021

Job Role: Senior Research Chemist (R&D)

Job Responsibilities & Achievement:

- Handling of lab operations and to work on various product development projects in relation to various product range offered by Metcem.
- Daily research work on products development and carrying out products formulation on Personnel Care Ingredients (PCI), Hygiene and Soap and detergents.
- Carrying out various analysis and quality inspections for raw material, in process and final products.
- To follow high quality standards and support shop floor production by providing them quality input.
- Running of trails and batch formulations of different range of hygiene, PCI products.
- ISO 9001:2015 surveillance audit on a quarterly basis (internal audit) and also on a yearly basis from external auditors.

Drury Industries Limited Aug. 2016 – May 2019

Job Role: Production Manager SAP 1
(Sulphuric Acid Plant 1)

Job Responsibilities & Achievements:

- Process control optimization of daily production output for Furnace Temperature, Catalytic bed converter and Economizers.
- Lessen of air pressure drop so as to maximize conversion efficiency at converter beds.
- Monitoring productivity data and developed corrective measures which led to 90 % increase in production Output for SAP1.
- Monitoring of special parameters with the process control personnel's on duty at every shift duty.
- Validating standard special parameters with the Actual plant parameters at SAP1 which gave 30 % increased of actual plant yield.

Eastern Distilleries for Food & Industries,
Nov 2013 – Jan 2015

Job Role: Process Control Supervisor

Job Responsibilities & Achievements:

- Early morning flushing and passing of lines before production start.
- Clearing of dirt in drinks/food during the cause of hazard in production floor (Emergency Response).
- Constant check of Alcohol Strength by Volume (ABV), pH, Temperature and Specific gravity of the alcoholic beverages.
- Carrying out stability test analysis and examination of retention samples.
- Carrying out finished products analysis testing.
- Carrying out products validation and checking of corking, threading and packaging integrity.
- Carrying out cleaning in place (CIP) weekly.
- Run a smooth production of Eskala and Brandy Almodia drinks for 10 days (non - stop) with a very good process control analysis in place.

Eastern Distilleries for Food & Industries, Nov 2012 - Oct 2013

Job Role: Line Supervisor

Job Responsibilities:

- Receiving daily raw materials from production units.
- Ensuring QA/QC personal passes the line before production start.
- Coordinating all the factory operatives on the lines (Including the head boy and head girl). Reconciliation of finished products with I.C.T unit.
- Reconciliation of raw materials/finished goods with head of issuer in production unit
