PROFILE

Experienced Full-Stack Developer with proficiency in both front-end and back-end technologies. Skilled in building robust and user-centric web and mobile applications utilizing a diverse stack, including Node.js, Java, Python, React, HTML, CSS, Tailwind CSS, and REST APIs.

EDUCATION

Masters in Business Administration

Henley Business School, Cape Town, South Africa

Diploma In Software Engineering

Semicolon Africa, Lagos State, Nigeria

Diploma In Marine Engineering

Delta School of Marine Technology, Burutu, Delta State, Nigeria

PROFESSIONAL EXPERIENCE

MERN Stack Developer

Punch Cool Agency, San Francisco December 2023 - Present

●Developed and maintained mobile applications using React Native, resulting in a 30% increase in user engagement.

Implemented robust backend services using Node.js and Express, improving application performance and scalability.

●Designed and integrated RESTful APIs to facilitate seamless communication between front-end and back-end systems.

●Deployed applications to both Google Play Store and Apple App Store, ensuring compliance with platform guidelines.

Full Stack Developer

Tranxactrust, Lagos State March 2023 - November 2023

●Developed a user dashboard using React that provides users with a clear and intuitive overview of their data and functionalities.

●Built, tested, and deployed Java (Spring Boot) APIs.

●Collaborated with cross-functional teams, including designers and product managers, to produce user-centered designs.

●Integrated third-party APIs for functionalities like user authentication, social media feeds, and

payment processing.
Backend Developer

Leumax Technology Limited, Lagos State January 2022 - February 2023

●Utilized Node.js within Agile development methodologies to deliver features iteratively and respond to changing requirements.

●Contributed to development and testing through regular sprints and continuous integration/continuous delivery (CI/CD) pipelines.

●Collaborated with cross-functional teams to ensure efficient functionality integration, optimization, and security implementation within user stories.
